

Ancient Historical Map

This ancient map dates back to the 15th century, depicting a great city positioned at the crossroads of two continents. Rivers flow from the north and east, meeting at a central harbor, which has been a hub for traders for centuries.

The symbols on the map represent the city's iconic landmarks:

- A grand palace marked by a star at the center of the map.
- The winding blue lines represent canals cutting through the city's heart, leading to the grand harbor.
- A large circular wall surrounds the ancient part of the city, where once stood a towering fortress that has now become a symbol of the city's power and resilience.

The map also shows a long, narrow bridge stretching over the water to connect the city with its neighboring regions. In the southern corner of the map, there is a symbol of a crescent moon, said to be a tribute to the city's rulers during its golden era.

This city, a meeting place of East and West, holds the history of empires, revolutions, and cultural transformations.
